Environmental Compliance Strategy RoHS and WEEE Directives

As a global supplier and manufacturer of industrial process control equipment, AMETEK Drexelbrook is committed to protecting the environment for future generations.

AMETEK Drexelbrook manufactures various Level Measurement Devices used as monitoring and control equipment designed for large scale equipment to detect and control their processes. This classification of equipment does not operate as a standalone device and is therefore outside the scope of the WEEE Directive.

In accordance with the 2002/95/EC (RoHS) Directive, our products are classified as Category 9 Monitoring and Control Equipment which is excluded from the RoHS Directive until the deadline for inclusion per the new Directive 2011/65/EU on July, 22, 2017. We are currently undertaking a review and update of all of our product lines and fully expect to be compliant by the July, 22, 2017 deadline.

Although our products are exempt from the RoHS and WEEE Directives, AMETEK Drexelbrook remains committed to the protection of our environment. As a result, we are actively pursuing compliance to meet the specified levels of hazardous substances while maintaining the highest levels of reliability, accuracy and quality that you have come to expect from AMETEK Drexelbrook.
